

# Exam Ready: Higher Knowledge

## ALGEBRA INSTRUCTIONS

Solve	<b>Find the value</b> of an unknown or variable
Iterate	<b>Repeatedly</b> carry out a process
Rearrange	<b>Changing the subject</b> of a formula
Evaluate	In maths, this means <b>find the value of</b>
Form	To <b>write</b> or <b>produce</b>
Expand	<b>Multiply</b> terms inside a bracket by those outside the bracket
Factorise	Reverse of <b>expand</b> , write using <b>brackets</b>

## INDEX LAWS: MULTIPLICATION AND DIVISION

Multiplying	<b>Add</b> the powers E.g. $a^m \times a^n = a^{m+n}$
Dividing	<b>Subtract</b> powers E.g. $a^m \div a^n = a^{m-n}$
Raising	<b>Multiply</b> powers E.g. $(a^m)^n = a^{mn}$
$p^0$	Anything to the power of 0 is <b>1</b>
$p^1$	Anything to the power of 1 is <b>itself</b>
Negative indices	<b>Reciprocal</b> E.g. $a^{-m} = \frac{1}{a^m}$
Fractional indices	<b>Root</b> E.g. $a^{\frac{1}{n}} = \sqrt[n]{a}$ The power $\frac{1}{2}$ = <b>square root</b> The power $\frac{1}{3}$ = <b>cube root</b>

## LINEAR GRAPHS

$y = mx + c$	<b>m</b> is the <b>gradient</b> and <b>c</b> is the <b>y-intercept</b>
Gradient	How <b>steep</b> a line is. Can be positive or negative <b>(Change in y)</b> <b>(Change in x)</b>
y- intercept	Where the line <b>crosses</b> the <b>y-axis</b>
Parallel lines	Lines with the same <b>gradient</b> (same 'm')
Perpendicular lines	The product of the two gradients is always <b>-1</b> , use the <b>negative reciprocal</b>

## PROBABILITY NOTATION

$P(A) =$	<b>Probability of an event A</b>
$P(A') =$	<b>Complement:</b> event A <b>will not occur</b>
$P(A \cap B) =$	<b>Intersection:</b> <b>both events A and B</b> will occur
$P(A \cup B) =$	<b>Union:</b> <b>event A or B or both</b> will occur

## PROPORTION

Direct Proportion	$y \propto x$ Equation of the form <b><math>y=kx</math></b>
Inverse proportion	$y \propto \frac{1}{x}$ Equation of the form <b><math>y = \frac{k}{x}</math></b>

## SIMILARITY

Length scale factor:  $x$   
Area scale factor:  $x^2$   
Volume scale factor:  $x^3$

## HISTOGRAMS

Histogram	Frequency = <b>Area</b> of the bars (No gaps)
Frequency density	The <b>heights</b> of the bars on a histogram $Frequency\ Density = \frac{frequency}{class\ width}$

## COMPARING DATA

Comparing Data	Compare <b>averages</b> to say who is <b>better/faster</b> Compare <b>ranges (IQR)</b> to say who is more <b>consistent</b>
----------------	--

## REAL LIFE GRAPHS

Distance-Time Graphs	The gradient of the line is the <b>speed</b>
Velocity-Time Graphs	The gradient of the line is the <b>acceleration</b> The area under the graph is the <b>distance</b>
Gradient of a Curve	Find the gradient of the <b>tangent</b> at that point
Area under a curve	To <b>estimate</b> the area under a curve, <b>split it up</b> into rectangles, triangles and trapeziums

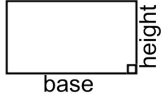

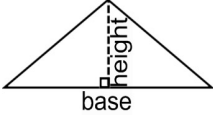

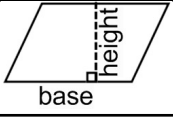

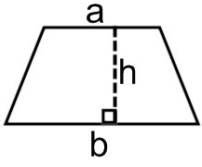

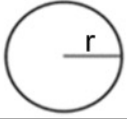

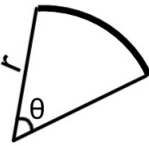

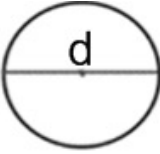

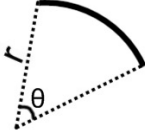

## CIRCLE THEOREMS

The angle in a semicircle is <b>90°</b>	
Angles in the same segment are <b>equal</b>	
The angle subtended at the centre of a circle is <b>twice</b> the angle subtended at the circumference	
Opposite angles in a cyclic quadrilateral add to <b>180°</b>	
Alternate segment theorem: Angles in <b>alternate segments</b> are <b>equal</b>	
A tangent meets a radius at <b>90°</b>	
Tangents from an external point are <b>equal in length</b>	

# Exam Ready: Higher Formulae

ANGLES IN POLYGONS: FACTS	
Sum of interior angles	$(n - 2) \times 180^\circ$ Where n is the number of sides
Sum of exterior angles	$360^\circ$
Interior angle + exterior angle =	$180^\circ$

AREA		
Area of a rectangle	$A = bh$ Area = <b>base x height</b>	
Area of a triangle	$A = \frac{bh}{2}$ Area = <b><math>\frac{\text{base x height}}{2}</math></b>	
Area of a parallelogram	$A = bh$ Area = <b>base x height</b>	
Area of a trapezium	$A = \frac{1}{2}(a + b)h$ Area = <b>half the sum of the parallel sides, multiplied by the distance between them</b>	
Area of a circle	$A = \pi r^2$ Area = <b><math>\pi</math> x radius<sup>2</sup></b>	
Area of a sector	$A = \frac{\theta}{360} \pi r^2$ Area = <b>the fraction of the full circle x <math>\pi</math> x radius<sup>2</sup></b>	

CIRCUMFERENCE		
Circumference of a circle	Circumference = <b><math>\pi</math> x diameter</b>  $C = \pi d$ OR $C = 2\pi r$	
Arc length	Arc length = <b>the fraction of the full circle x <math>\pi</math> x diameter</b>  $L = \frac{\theta}{360} \pi d$ OR $L = \frac{\theta}{360} 2\pi r$	

VOLUME	
Prism	Volume = <b>area of cross section x length</b>
Pyramid	Volume = $\frac{1}{3}$ x <b>base area x length</b>

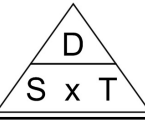

SOLVING QUADRATIC EQUATIONS	
The quadratic formula	$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$

Pythagoras's Theorem	
Pythagoras' Theorem	$a^2 + b^2 = c^2$

TRIGONOMETRIC RATIOS	
Sin	$\sin\theta = \frac{\text{opposite}}{\text{hypotenuse}}$
Cos	$\cos\theta = \frac{\text{adjacent}}{\text{hypotenuse}}$
Tan	$\tan\theta = \frac{\text{opposite}}{\text{adjacent}}$

EXACT TRIG VALUES					
	$0^\circ$	$30^\circ$	$45^\circ$	$60^\circ$	$90^\circ$
<b>sin</b>	0	$\frac{1}{2}$	$\frac{\sqrt{2}}{2}$	$\frac{\sqrt{3}}{2}$	1
<b>cos</b>	1	$\frac{\sqrt{3}}{2}$	$\frac{\sqrt{2}}{2}$	$\frac{1}{2}$	0
<b>tan</b>	0	$\frac{1}{\sqrt{3}}$	1	$\sqrt{3}$	---

TRIGONOMETRIC RULES	
Sine rule	Use with <b>non right angled</b> triangles
Sine Rule (for an angle)	$\frac{\sin A}{a} = \frac{\sin B}{b} = \frac{\sin C}{c}$
Sine Rule (for a side)	$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$
Cosine rule	Use with <b>non right angled</b> triangles. Use when the question involves <b>3 sides and 1 angle</b>
Cosine Rule (for a side)	$a^2 = b^2 + c^2 - 2bc\cos A$
Cosine Rule (for an angle)	$\cos A = \frac{b^2 + c^2 - a^2}{2bc}$
Area of a triangle (trig)	$\text{Area} = \frac{1}{2} ab\sin C$

COMPOUND UNITS		
Speed formula	Speed = <b>Distance</b> ÷ Time Distance = <b>Speed</b> × Time Time = <b>Distance</b> ÷ Speed	
Density formula	Density = <b>Mass</b> ÷ Volume Mass = <b>Density</b> × Volume Volume = <b>Mass</b> ÷ Density
